i3-TECHNOLOGIES

i3GLIDE Flatpanel column solution.

The i3GLIDE is a height-adjustable column solution for flat panels that uses a double counterweight to move the interactive flat panel smoothly, offering greater comfort and accessibility.

High comfort level

Hardly any power needed to initiate the movement of the interactive flat panel, as a result of the double counterweight. This offers an enormous comfort and is a unique feature on the market. Flat panels can be moved far down, making them easily accessible, even for small children and disabled people.

Sustainable

Exclusively high quality materials – steel and aluminum – are used in the production of the sliding mechanism, therefore a long lifecycle is guaranteed. For the finishing of all metal elements, solvent free powder coating is used. This is not only environmental friendly, but ensures that rust will never occur.

Versatile

All kinds of setups are possible. A simple setup can consist of solely an interactive flat panel, or combined with a single or a double surface, or with add-ons. The interactive flat panel mount is compliant with the VESA standard.

PRODUCT SPECIFICATIONS

Model name	i3GLIDE
Article number	10010123 i3GLIDE for EX75 , 10010122 i3GLIDE for EX86, 10010125 i3GLIDE + Add-on for EX75, 10010124 i3GLIDE + Add-on for EX86
Compatible with	i3TOUCh EX86 & EX75
Column Height	265cm
Column material	Aluminium
Shock absorbing system	Rubber stop to dampen the stopping of the display
Height adjustable	Manual, with counterweight
Add-on	Optional whiteboard (wings)
Warranty	5 years
